# Hurricane Iselle Projected Damage Areas

Landfall Has Occurred

**For Planning  
Purposes Only!**

## Post Landfall Projected Damage Areas

This model is based on a  
Category 1 storm making landfall  
Landfall near Hilo, HI.

Forecast Track

Historic Track

### Projected Damage Areas

- CAT 0-type damage
- CAT 1-type damage
- CAT 2-type damage
- CAT 3-type damage
- CAT 4-type damage
- CAT 5-type damage

Information provided on this page displays a projected or actual Category 1 storm making landfall Landfall near Hilo, HI. These projections are based on information from the NHC (0630 EDT 08/08/2014) forecast and extrapolated by LRL staff to represent a landfall condition that has either occurred or may occur in the near future.

### Debris

- < 100,000 cubic yards
- 100,000 - 249,999 cubic yards
- 250,000 - 499,999 cubic yards
- 500,000 - 999,999 cubic yards
- > 1,000,000 cubic yards

Information provided on this page displays a Category 1 storm making landfall near Hilo, HI. These projections are based on information from the NHC (0630 EDT 08/08/2014) forecast. The amount of debris forecasted is possible total volume, not necessarily the volume that may need to be removed with Federal funds, but does not include volume that may be covered by private insurance. Debris volume may include storm surge generated debris.

US Army Corps of Engineers  
All Rights Reserved

0 200 400 Miles

Information provided on this page displays a Category 1 storm making landfall near Hilo, HI. These projections are based on information from the NHC (0630 EDT 08/08/2014) forecast. The amount of commodities forecasted is based on Mission Guide Book requirements and SME input. The graphic represents daily needs with a ramp-up in the distribution system—three days for Points of Distribution (PODs) to be fully in place and operational. Volume shown is for each commodity—water and ice. Commodity need may be supplied by multiple agencies and/or sources.
